News Briefs

The First Herbert M. Evans Memorial Lecture will be delivered by Choh Hao Li, Professor of Biochemistry and Experimental Endocrinology and Director, Hormone Research Laboratory, on Wednesday, Oct. 20 1364 S at 2 p.m. The lecture is entitled "Chemical Messengers of the Pituitary Gland — From Somatotropin to Lipotropin". Dr. Li, who was the first to prepare animal growth hormone (discovered by Dr. Evans) in crystalline form, has also isolated human growth hormone (1956), described its chemical structure (1966), and identified several other hormones of the pituitary, including lipotropin. In 1950, Dr. Li became Director of the Hormone Research Laboratory, then in UC-Berkeley and now on this campus. He was elected to the National Academy of Sciences in 1973. Miriam E. Simpson, Professor of Anatomy Emeritus and Director Emeritus, Institute of Experimental Biology, UC-Berkeley, will present the foreword, "Dr. Evans' Objective." A key member of Dr. Evans' group of research workers, Dr. Simpson was made a Professor of Anatomy in 1945 and succeeded Dr. Evans as Director, Institute of Experimental Biology in 1953. She has made important contributions in the areas of vital stains, identification of blood cells, anterior pituitary hormones, ovarian function, and other aspects of reproductive physiology. Dr. Simpson attained emeritus status in 1961.

An unique learning community of retired persons — the Center for Learning in Retirement (CLIR) recently was hosted by UCSF. Thirty members of the organization visited the campus on Tuesday Oct. 12. In the morning they heard a series of mini-lectures in Cole Hall on various aspects of UCSF including an "anecdotal history" by Chauncey D. Leake, Sr. Lecturer, History of the Health Sciences and an "architectural history" by architect Derek Parker. These were followed by a talk given by Tom Gwyn, public service programs director, on community interaction and programs, and a discussion of the new dental facilities by Dean Ben Pavone. Robert Derzon, Director of Hospitals and Clinics, concluded the morning session with a discussion of the Moffitt Hospital modernization project. Following a luncheon in the Chancellor's Conference Room, the group toured the campus visiting Radiology, Pharmacy, Dentistry, the Nursing Skills laboratory, and the Pathology Museum. CLIR is headquartered at UC Extension, 55 Laguna St., S.F.

A leading expert in brain trauma, Julian T. Hoff, Vice-chairman of the Department of Neurological Surgery, has relocated his office from San Francisco General Hospital, where he was chief of the Neurosurgery Service, to Moffitt Hospital. In December, he will move his research activities to the UCSF Brain Tumor Research center.

The newly created Division of Neurobiology in the Physiology Department is under the direction of Zach W. Hall, professor of Physiology. The Neurobiology Division is the focus of an interdisciplinary approach to the neural sciences that brings together faculty from various campus departments that study the nervous system. The new Division conducts research and administers an interdepartmental graduate degree program in the neurosciences. Dr. Hall, who has a Ph.D. in biochemistry from Harvard University, was associate professor of Neurobiology at Harvard Medical School from 1972 until his appointment here. He has held fellowships at Harvard, Stanford, the Medical Foundation, Inc., has received a Research Career Development Award from the National Institute of Neurological & Communicative Disorders and Stroke. He is also Associate Editor of Annual Review of Neurobiology and a member of the fellowship review committee for the Muscular Dystrophy Association.

UCSF nurses and student nurses are participating as volunteers in a program, Health Improvement, which is sponsored by SPEAK (Sunset-Parkside Education and Action Committee, Inc.) in cooperation with the UCSF School of Nursing and District Health Center #5. Members of Health Improvement attend two sessions, one for testing and the second to receive results and explanations of each test. The cost of a two-year membership is $28 and the program is open to everyone 18 years or older. In addition to the tests, Health Improvement provides a "Health Hazard Appraisal" of health habits and their risks and benefits. There is also a newsletter sent to members which contains current information on health related matters. Participants are encouraged to share test results with their physician for diagnosis and any necessary treatment.

Nominations are requested for the Faculty Research Lecturer which represents the foremost recognition for scientific achievement awarded by the San Francisco campus of UC. From the outstanding scientists at this University, one member is selected each year for recognition. In order to be considered for this honor, nominations must be submitted by peers in the university community. Academic Senate members are encouraged to consider the contributions of their associates and submit names for nominations. Nominations can be made by any Academic Senate member by submitting the following: 1) a one-page summary of the most outstanding achievements of the candidate's scientific career, 2) a curriculum vitae, 3) several (no more than four) representative reprints of the candidate's publication. These materials should be submitted by Friday, November 19 to: Committee on Research, Academic Senate Office, 119 S.

SFGH Briefs

The Third Annual City Conference on Child Abuse will be held Wednesday, October 20, from 9 a.m. to 5 p.m. at the Unitarian Center, 1187 Franklin St., S.F., it was announced by the Child Abuse Council. The Council, a citywide coordinating program for better understanding and prevention of the child abuse problem, is funded under a Rosenberg Foundation grant. It is administered by UCSF through the Council's project director, Moses Grossman, Professor of Pediatrics, UCSF and Chief of Pediatrics, SFGH Medical Center. Highlights of the day-long conference include opening remarks by Mayor George R. Moscone; a keynote address by Author-Educator George Leonard; workshop sessions; a 45 minute drama on child abuse, "Dessie", performed by the nationally known husband and wife acting team, Linda and Conrad Bishop; and a report on legislation by State Senator Nicholas Petris, of Alameda County. Conference coordinator is Kathy Baxter, 647-4576.

A new program of free classes on "Self-Health for Women" will be offered this fall by the Women's Clinic at SFGH Medical Center. The classes were developed in response to women's desire for a better understanding of their own bodies and the trend toward encouraging women to participate more actively in their own health care. The Women's Clinic at SFGH is under the supervision of the UCSF Department of Obstetrics and Gynecology, and is operated by the SF Department of Public Health. The Self-Health program is one of several innovative educational and preventive health projects being conducted by the Women's Clinic under a grant from the San Francisco Foundation. Two series of five sessions each, limited to small groups of women, will be offered Monday evenings from 5:30 to 7 p.m. and on Friday mornings from 10 a.m. to 12 noon. Opening dates will be announced following the signup period which is now under way. For information and to register for classes call Penn Garvin, 565-8166.

The Family Planning Clinic at SFGH Medical Center has now moved to cheerful new quarters on the Fifth floor, Section A, in the new Clinics Wing at the recently completed, $42.5 million SFGH. Expanded hours of this service, which is free to those unable to pay and wanting advice on contraception, pregnancy, abortion and sterilization, are: Mondays, Wednesdays, Thursdays and Fridays, 8:30 a.m. to 4:30 p.m.; and Tuesdays, 12 noon to 8 p.m. For an appointment call 648-8200.
